

Maintenance Planner - CYD Decline, Red Lake Mine.

[Byrnegut Canada Ltd](#)

Red Lake, Ontario

The Byrnegut Group

With over 4,000 employees around the globe, the Byrnegut Group is a leading full service underground mining contractor, servicing major mine owners internationally. We operate a multi-million dollar fleet of specialised underground mining equipment across several continents and deliver industry leading performance through innovation, quality, safety and reliability. We train and upskill our people into world class mining professionals and offer them the opportunity to work on exciting projects around the world.

In line with our growth plans in North America, Byrnegut Canada Ltd has been selected to deliver high speed, fully mechanized decline/ramp development services for the Campbell Young Dickenson Decline Project, Red Lake, Canada. We are seeking a dynamic team to be a part of this exciting project which will utilize the latest high capacity, high automation equipment.

The Role

We are seeking applications for a Maintenance Planner position. Reporting to the Maintenance Foreman, this role is critical for ensuring that scheduled maintenance and servicing of the equipment fleet is carried out safely and efficiently to deliver sustained high fleet availability for the underground development crews.

Responsibilities/duties:

- Management and Distribution of OEM Service and Safety Bulletins including raising of work orders and purchase orders to complete required actions
- Management and Document Control of all: Service Sheets, Scheduled Inspections, Component Schedules & Mobile Plant Notifications
- Monthly review and reporting of Fleet Mechanical Maintenance KPI's for each site
- Monthly review and reporting of Warranty work in progress
- Monthly Review of PPH Component Schedules including 1 – 3 month forecast
- Review and Actioning of OEM machinery and oil analysis reports
- EMS Maintenance, Maintaining Service Sheets, Plant Scheduling & Plant Servicing setup
- Pronto Maintenance Training Support
