

## Occupational Health and Safety Trainer – CYD Decline, Red Lake Mine.

[Byrnegut Canada Ltd](#)

Red Lake, Ontario, Canada

### The Byrnegut Group

With over 4,000 employees around the globe, the Byrnegut Group is a leading full service underground mining contractor, servicing major mine owners internationally. We operate a multi-million dollar fleet of specialised underground mining equipment across several continents and deliver industry leading performance through innovation, quality, safety and reliability. We train and upskill our people into world class mining professionals and offer them the opportunity to work on exciting projects around the world.

In line with our growth plans in North America, Byrnegut Canada Ltd has been selected to deliver high speed, fully mechanized decline/ramp development services for the Campbell Young Dickenson Decline Project, Red Lake, Canada. We are seeking a dynamic team to be a part of this exciting project which will utilize the latest high capacity, high automation equipment.

### The Role

We are seeking applications from passionate, qualified and experienced Underground OH&S Professionals. This is an essential operational position and you will be an integral part of the site management team delivering safety and training in accordance with mine specific, internal and statutory requirements.

### Duties & Responsibilities:

- Develop and prepare safety and training records
- Assess employee skill levels and deliver ongoing training as required
- Conduct underground visits to review trainee progress and provide on-the-job feedback
- Review training programs to ensure compliance with internal and regulatory requirements.
- Own and track Common Core and Specialty Module requirements for the workforce
- Communicate closely with management and supervisors
- Reporting and data entry as required

### Essential Criteria:

- Minimum 5 years operational underground experience in all facets of the underground mining cycle
