

Underground Mining Engineer - CYD Decline, Red Lake Mine.

[Byrnegcut Canada Ltd](#)

Red Lake, Ontario, Canada

The Byrnegcut Group

With over 4,000 employees around the globe, the Byrnegcut Group is a leading full service underground mining contractor, servicing major mine owners internationally. We operate a multi-million dollar fleet of specialised underground mining equipment across several continents and deliver industry leading performance through innovation, quality, safety and reliability. We train and upskill our people into world class mining professionals and offer them the opportunity to work on exciting projects around the world.

In line with our growth plans in North America, Byrnegcut Canada Ltd has been selected to deliver high speed, fully mechanized decline/ramp development services for the Campbell Young Dickenson Decline Project, Red Lake, Canada. We are seeking a dynamic team to be a part of this exciting project which will utilize the latest high capacity, high automation equipment.

The Role

We are seeking applications from experienced Underground Mining Engineers to join our team. Working closely with the Project Manager and Underground Foreman, this role is critical to the efficient day-to-day operations and safe delivery of the project schedule.

Duties & Responsibilities

- Ensure that contract operations are run in accordance with company policies, procedures, and goals and that the highest standard of professionalism and integrity is maintained
- Ensure that daily/weekly & monthly reports are completed in a timely and accurate manner for submission to the client and Management
- Preparation of monthly claims and supporting documentation
- Review and preparation of short term development and production schedules
- Ensure Key Performance Indicator targets are achieved or exceeded on a monthly basis
- Attend Client/Management Team meetings and preparation of contractual documents, operational performance, and cost data for the Client/Management Team
